

HU TOOL

HAMMER UNION
WRENCH

Torq/Lite's patented HU Tool clamping wrench is designed specifically to work on Hammer Union connections while eliminating the need for the hammer the connections were named for.

The new and improved HU wrench is capable of fitting all registered Hammer Union sizes. The easy-to-latch heads make installation and set-up simple, while the spring-loaded action provides nearly a completely hands-free operation.

PATENTED

SPRING HEAD

The head features the same patented open-gate design as Torq/Lite's JN Series wrenches, but has a spring-latch feature that makes applying and removing the tool very simple. Fixed to the inside of the head are the jaws, used to clamp the pipe.

SAFE

The safety increases exponentially when you remove a hammer from a situation and add a tool that does not require a dangerous swinging motion to operate.

INTERCHANGEABLE HEADS

With only the need for one HU Tool, our interchangeable heads are the only thing you'll need to be changing when tightening or loosening Hammer Union connections. Each head includes a welded jaw that clamps to the application and turns as it advances for a more efficient way to work. The HU Tool and our entire range of interchangeable heads will fit on all registered Hammer Union connections.

NON DESTRUCTIVE

Throughout their lifespan, the Hammer Union lugs can take a lot of beatings - literally. The HU Tool reduces the impact on those lugs and eliminates the damage caused by the hammers, saving replacement time and costs.

ADJUSTABLE REACTION

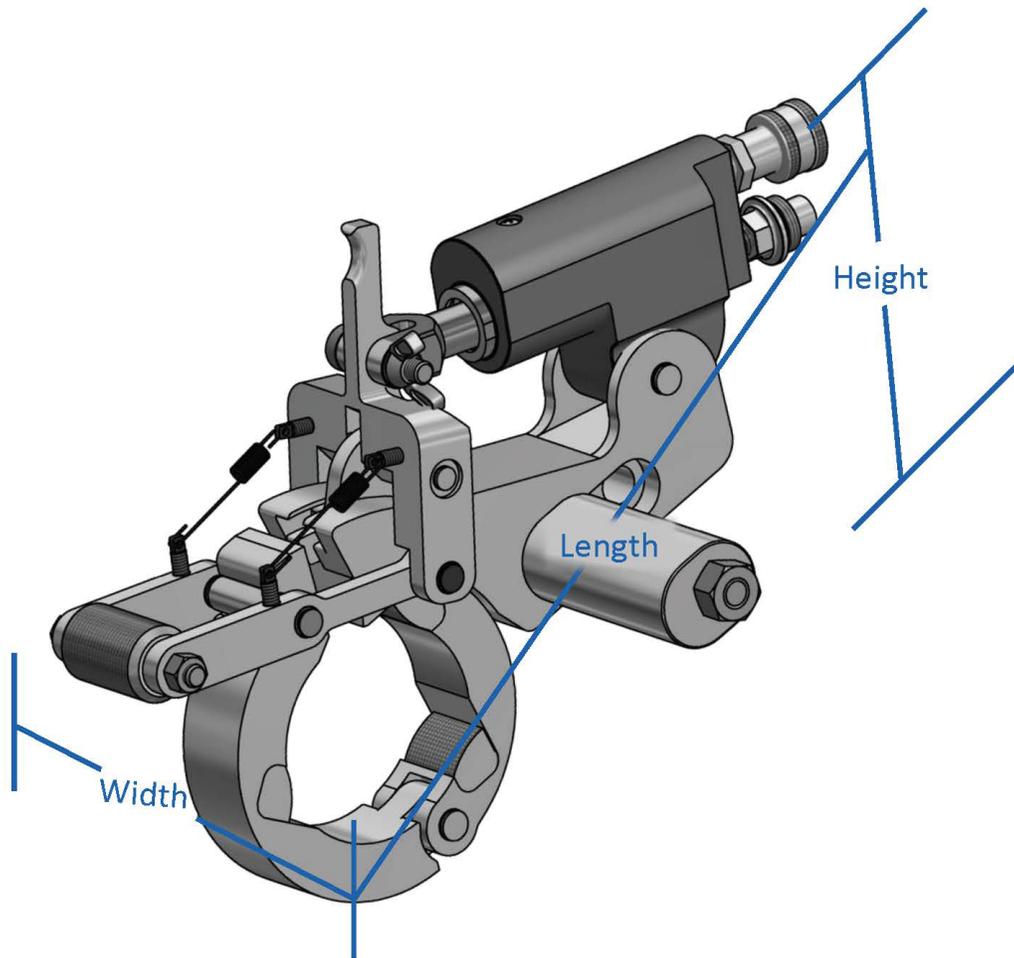

The adjustable reaction arm allows the HU Tool to fit all registered Hammer Union connections.

NO HANDS

Once the tool is applied to the Hammer Union connection, the operator does not need to use his hands to hold the tool in place. Alternatively if the operator so chooses, a handle is provided so that he can hold the tool safely.

CONTROLLED LOAD

Since the operator is not striking a hammer, the load is able to be applied to the connection in a stable, constant, and controlled manner.

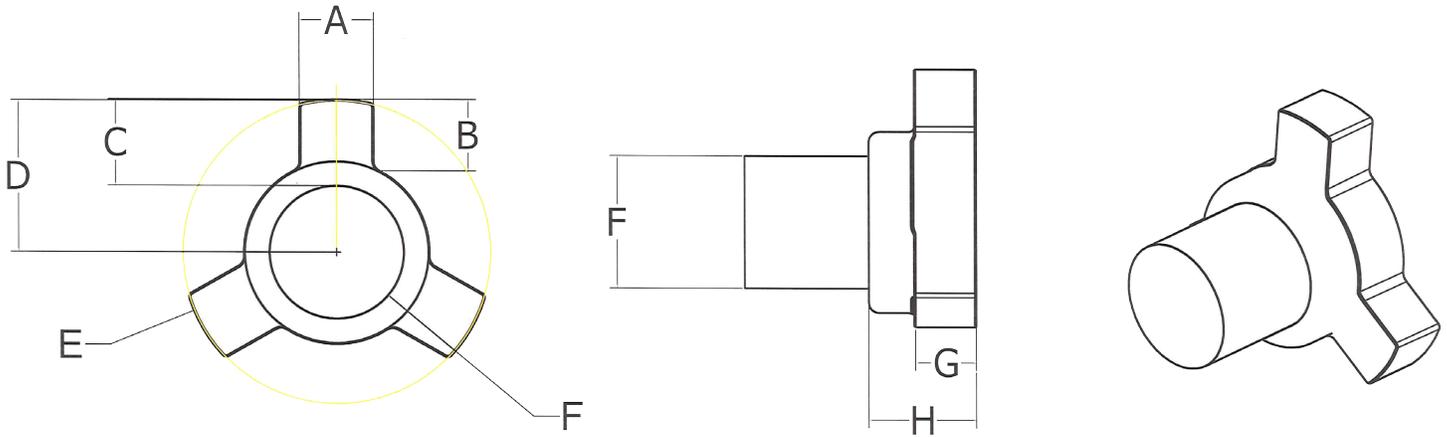

SERIES	TOOL LENGTH *	TOOL HEIGHT	TOOL WIDTH	REACTION BAR WIDTH	COMBINED WIDTH	"SPLIT HEAD" RANGE
HU	14 ⁷ / ₈ " - 16 ¹⁵ / ₁₆ "	10 ⁵ / ₈ "	3 ¹ / ₂ "	3 ³ / ₄ "	5 ¹¹ / ₁₆ "	1 ³ / ₄ " - 6 ¹ / ₂ "

**DEPENDING ON HEAD SIZE*

The HU Tool will work on any standard torque wrench pump, eliminating the need to purchase a special unit to operate it.
